

Understanding and Managing Depressive Disorders

A 6-Hour Home Study Program for Health Professionals

Major depression is a leading cause of reduced life expectancy, disability, and impaired quality of life.

About half of people experiencing severe depression fail to seek treatment, and about half of people receiving treatment do not respond or relapse.

This program provides updated, evidence-based diagnostic and treatment guidelines, and reviews advances in overcoming treatment-resistant depression.

Participants completing this 6-hour program should be able to:

1. Identify major characteristics of depression.
2. Describe how cortisol, a stress-related hormone, can undermine mood.
3. Distinguish between the psychological and biological symptoms of depression.
4. Name several medical risk factors for depression.
5. List several psychological risk factors for depression and evidence-based psychological treatments.
6. Compare the long-term effectiveness of pharmacologic therapies to non-pharmacologic treatments.
