Advances in positive psychology reveal how happy people develop habits that help them maintain positive emotions, thoughts and actions.

Happy people generally have better medical, dental and psychological health and improve the health of people around them.

Participants completing this evidence-based program should be able to:

1. Identify habits that can lead to meaningful increases in happiness.
2. Discuss how happiness can increase resilience to psychological stress and physical disorders.
3. Describe how positive thoughts elevate mood and reduce anxiety.
4. Name several interpersonal habits that can enhance happiness.
5. Describe habits that calm the overactive brain.
6. List five brain challenges to maintain happiness-related habits.
