

Principles of Managing Pain: Non-Drug Interventions

A 6-Hour Home Study Program for Health Professionals

Chronic pain increases the risk of chronic stress, elevated cortisol, low-grade inflammation, immune suppression, and disorders of anxiety, mood and sleep.

Participants completing this 6-hour program should be able to:

- 1. Explain the connection between pain, stress, inflammation, immune suppression, and impaired sleep.*
- 2. Describe several effective behavioral interventions for pain,*
- 3. Describe several other effective non-drug treatments for pain,*
- 4. List conventional and complementary forms of pain relief that are evidence-based for a selected pain-related condition.*
