HOW POSITIVE EMOTIONS CAN IMPROVE STRESS RESILIENCE

FREQUENTLY ASKED QUESTIONS

Q: Is there a way to enjoy the webcasts without being at my computer for 6 hours? What if I am not free on any of the scheduled dates of the broadcasts?

Yes! First, register for the program. You will receive a link to view the program starting March 13 until June 18. The program will be divided into four segments of approximately 75 minutes for user-friendly viewing.

Q: What if I have technical issues getting and staying connected, difficulty seeing the slides, or hearing the speaker?

We have an expert videographer to capture the sound and slides. We will make copies of the outline available to the participants. Further, in the unlikely event that you have connection problems, IBP will provide registrants with a free set of 4 CDs or DVDs of the entire program.

Q: I'd like to view the program and receive credit but without watching the live program or downloading it and still receive continuing education credit. Can I do this?

Yes! The cost of the DVD or CD set will be the same as the cost of the live program. Register now, let the operator know you will want the CD or DVD set (specify which), and make sure your profession is included in our online brochure.

Q: Can I attend this program live?

Yes, but only if you live in a city where IBP is currently presenting this seminar.

Q: My profession is not included on the brochure. Can I receive continuing education credit?

Maybe. Please contact our customer service at (888) 202-2938.

Q: How long does it usually take to receive a certificate of completion?

Typically, within 3 or 4 business days.

The ability to experience positive emotions is one of the most powerful and effective forms of stress regulation.

This unique program provides practical information from the field of Affective Neuroscience. Learn how altering appraisal provides an effective way to improve mood, self-esteem, well-being, and resilience.

Participants completing this 6-hour program should be able to:

- 1. Summarize what is meant by the positive brain.*
- 2. List several disorders of emotional appraisal.*
- 3. State how emotion appraisal can reduce stress.*
- 4. Outline steps that enable a person to re-appraise stressors.*

The Positive Brain

- **How the Brain Believes Things are Going Well:** emotion appraisal, stress-resilience, and the ventromedial prefrontal cortex (vmPFC); unlocking the key to Positive Psychology.
- **Maintaining Positive Emotions:** dopamine, anticipation of rewarding experiences, and the ventral striatum.
- **Understanding Well-being:** how positive memories and expectations can reduce acute threat and ongoing stress.

Disorders of Emotion Appraisal

- **Mood Disorders:** loss of enjoyment (anhedonia), low self-worth, reduced motivation, difficulty imagining a positive future, negative emotion appraisal, and dopamine.
- **Pathological Narcissism:** grandiosity, impaired emotion regulation, and appraisal of self-worth.
- **Impaired Empathy:** deficient ability to appraise emotions of other people following damage to the vmPFC.
- **Risk-Taking:** inability to access emotions to avoid harm.
- **Immorality:** damage to the vmPFC, impaired moral judgment, and sociopathy.

How Emotion Appraisal Can Reduce Stress

- **Keys to Producing Positive Emotions During Stress:** using the power of emotion appraisal.
- **Evoking the Experience of Feeling Safe:** following positive appraisals, the vmPFC sends safety signals that a stressor can be managed, a key to improving resilience.
- **Safety Signals and the Brain:** altering the experience of threat by changing how the stressor is appraised and reducing the stress hormones noradrenaline and cortisol.
- **Safety Signals and the Body:** how somatic symptoms associated with stress are calmed by means of activating the parasympathetic nervous system.
- **Experiencing a State of Flourishing:** internalizing meaningful goals and sense of purpose to experience well-being even during ongoing stressors.

Strategies to Reduce Stressors by Modifying Emotional Appraisal

- **Evidence-based approaches to reduce threat and increase well-being:**
 - How to retrieve positive memories
 - Viewing stressors as challenges instead of as threats
 - How to revise an initial appraisal of a threat
 - How to imagine (simulate) a more positive future
 - Experiencing and expressing compassion
 - Improving emotional appraisal of self-esteem
 - Giving and receiving meaningful social support
- **How to Re-Appraise Stressors:** the ability to see both adverse and beneficial elements of stress is a powerful technique for enhancing stress resilience:
 - Activating and maintaining emotion regulation
 - Inhibiting an initial stress-related appraisal
 - Selecting an alternative interpretation
 - Developing a positive alternative narrative
 - Monitoring if the emotional goal is met
 - Making adjustments to improve re-appraisal
 - Sustained motivation to maintain the goal
 - Changing how we think by changing how we feel

ABOUT THE INSTRUCTOR

Christian Waugh, Ph.D., Professor of Psychology at Wake Forest University, NC, is a leading expert in Affective Neuroscience, the study of stress resilience and emotion regulation. His research features resilience as the result of stress, trauma, and the ability to experience positive emotions in times of stress.

Dr. Waugh has been twice honored for teaching excellence at Wake Forest. His presentations at IBP have been praised for their abundance of practical information delivered with enthusiasm, clarity, and humor. Participants receive a detailed outline prepared by Dr. Waugh for all lecture topics and key references.

Dr. Waugh will answer your questions in class, during the second half of the lunch break, and by email after the program adjourns.
