Medical foods are FDA-monitored foods specially formulated to meet the nutritional requirements of specific diseases. Medicinal foods include a variety of nutrients that are available without prescription.

In this program, learn the composition of medical foods, medicinal foods, and the validity of claims made about their uses for treating disorders of attention and cognition, mood, pain, inflammation, metabolism, and sleep.

Participants completing this program concerning the effectiveness of selected medical foods and medicinal foods should be able to:

1. Discuss nutrients indicated for attention and cognition.
2. Review nutrients related to major depressive disorder and persistent depressive disorder.
3. Evaluate nutrients recommended for osteoarthritis, backache, headache or neuropathic pain.
4. Identify nutrients indicated low-grade, chronic inflammation.
5. Review nutrients indicated cardio-metabolic factors underlying type 2 diabetes, coronary artery disease and stroke.
6. Name nutrients indicated for disorders of initiating or maintaining sleep.

Attention and Cognition
