

How People Change their Minds to Adopt Healthful Habits

A 6-Hour Home Study Program for Health Professionals

If clients were to follow the advice of their health professionals including eating, physical activity, drinking, smoking, prescription and addictive drugs, a majority of heart attacks, strokes, cancers and other chronic conditions could be prevented or delayed.

This program presents eight key methods developed by social psychologists to help people change their minds to adopt health related behaviors. However, in order to achieve sustainable change, it is also necessary to develop durable health-promoting habits.

Participants completing this program should be able to describe:

1. Motivational Interviewing, Readiness to Change, and Self-Efficacy methods to change minds and the brain.
2. Methods to translate intentions into action, compel action using health messages, and create meaningful change using social influence.
3. Intrinsic Motivation and Relapse Prevention models for promoting behavioral change.
4. Self-regulation to acquire positive habits and the habit brain.
5. Brain-based tools for retraining the habit brain.
