

Memory, Aging, Stress, Diet and Cholesterol: Current Brain Controversies and Discoveries

A 6-Hour Home Study Program for Health Professionals

A revolution is occurring in our understanding of how memory, stress, diet and cholesterol affect brain health and cognition. This new understanding provides critical information for health professionals working in medical, dental and behavioral health practices.

Participants completing this program should be able to identify key issues and discoveries regarding:

1. Different forms of memory and the causes of forgetting.
2. Maladaptive effects of stress-related hormones on the regulation of mood, trauma and post-traumatic stress.
3. Evidence-based benefits and risks of fats, grains, sugars, diets, and select nutraceuticals on brain health, disease risk and longevity.
4. Benefits and risks of current and next generation statins for managing and preventing disorders affecting the brain and heart.

NURSES: Institute for Brain Potential (IBP) is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation. IBP is approved as a provider of continuing education by the California Board of Registered Nursing, Provider #CEP13896, and Florida Board of Nursing. This program provides 6 contact hours.
