

The Opioid Epidemic: What Licensed Health Professionals Need To Know

A 6-Hour Home Study Program for Health Professionals

The opioid epidemic in the United States has reached unprecedented proportions. The regions in the United States with the highest proportion of overdose-related deaths are depicted in red and orange in the graphic.

Over 100 million Americans are in chronic pain, and these individuals are at particular risk of developing opioid dependence and addiction. In addition, vulnerabilities to addiction include trauma, mood disorders, PTSD, and disorders of impulse control.

Participants completing this important program should be able to identify:

1. Key risk factors for developing opioid addiction.
2. How the chronic use of opioids can increase sensitivity to pain and alter the habit brain.
3. How to treat opioid withdrawal, prevent overdose, and other adverse events.
4. Best practices in preventing opioid-related disorders including prescription safeguards.
5. Best practices for treating people with analgesic-related opioid use disorders through pharmacological and psychological interventions.
